

MEFIRST SOFTWARE SOLUTIONS

DisplayQue Software Suite

Connect your screens.
Connect your operations.

SignagePro / StatusBoard / POS

Plus connected sales, service, rental, CRM, HRM and survey workflows. Plan your software, displays and rollout with MeFirst.

Start with one workflow. Connect what comes next.

Nine platform areas, with modules selected around how your business operates.

01

SignagePro

Media, playlists, schedules, campaigns and screen groups.

02

StatusBoard

Tokens, counters, pickup progress and public status.

03

POS

Counter and table sales, menus, kitchen flow and payments.

04

Sales

Customers, quotations, orders, invoicing and stock.

05

Rental

Availability, bookings, issues, returns and renewals.

06

Service

Cases, technicians, product history and service progress.

07

ConnectCRM

Leads, follow-ups, communication and customer history.

08

HRM

Employees, attendance, leave, shifts and payroll workflows.

09

Survey

Branded feedback forms, responses and analysis.

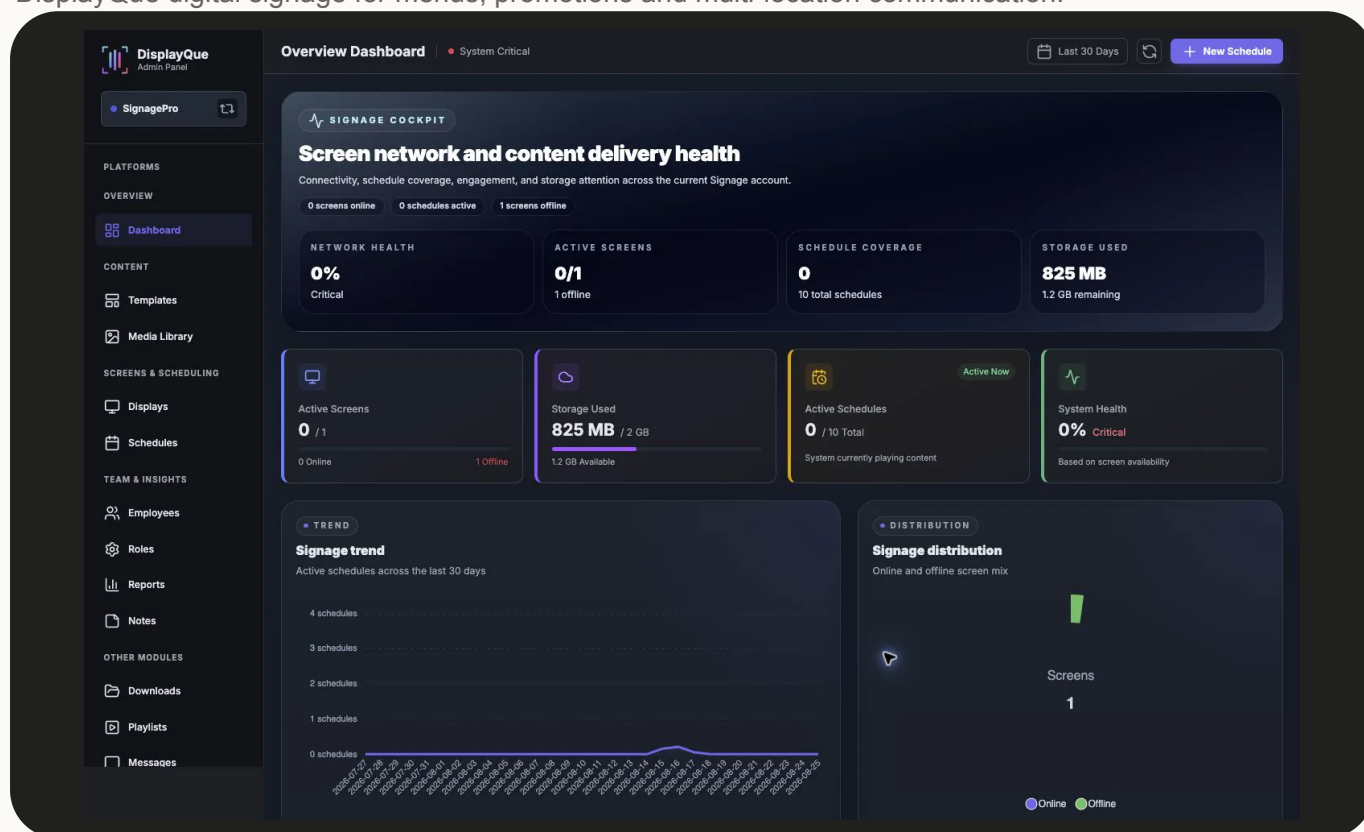

One connected foundation

Scope shared customers, products, people, roles and documents across the selected modules. Start with the workflows you need, then review additional modules as your business grows.

The right message. On the right screen.

DisplayQue digital signage for menus, promotions and multi-location communication.

Public DisplayQue product-tour screen. Example workspace data; interface may evolve.

MANAGE CENTRALLY

Content that stays current

Organise approved images and videos, reusable templates, playlists and zones. Schedule campaigns for selected screens and groups without repeating the same setup at every location.

WHERE IT FITS

From menus to messages

Restaurant menus, retail offers, hotel information and workplace updates. Keep publishing responsibilities clear, with the selected roles and access agreed during configuration.

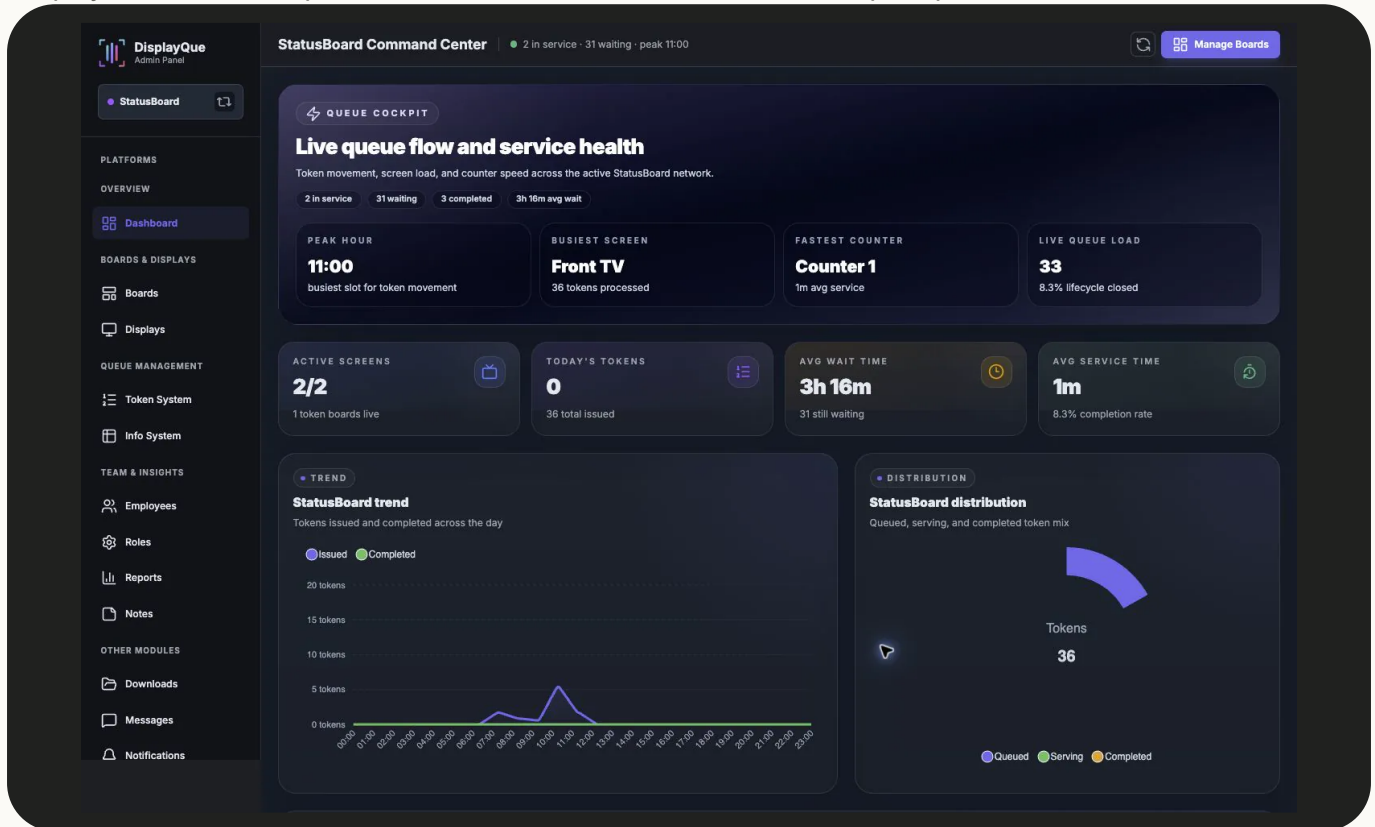

Plan it with MeFirst

Confirm the display or player, media formats, connection, publishing schedule, staff access and content ownership. Hotel-room device control is a separate requirement.

[Explore SignagePro >](#)

Make the next step clear to every customer.

DisplayQue token and queue software for counters, clinics and order pickup.

Public DisplayQue product-tour screen. Example workspace data; interface may evolve.

LIVE CUSTOMER INFORMATION

Keep waiting visible

Show tokens, called counters, pickup progress and service status on customer-facing displays. Define each stage of the queue so operators and customers see a consistent flow.

CONNECTED COMMUNICATION

A board with a purpose

Assign displays to the relevant board and update status as service moves. Where configured, combine queue information with useful notices and promotional content.

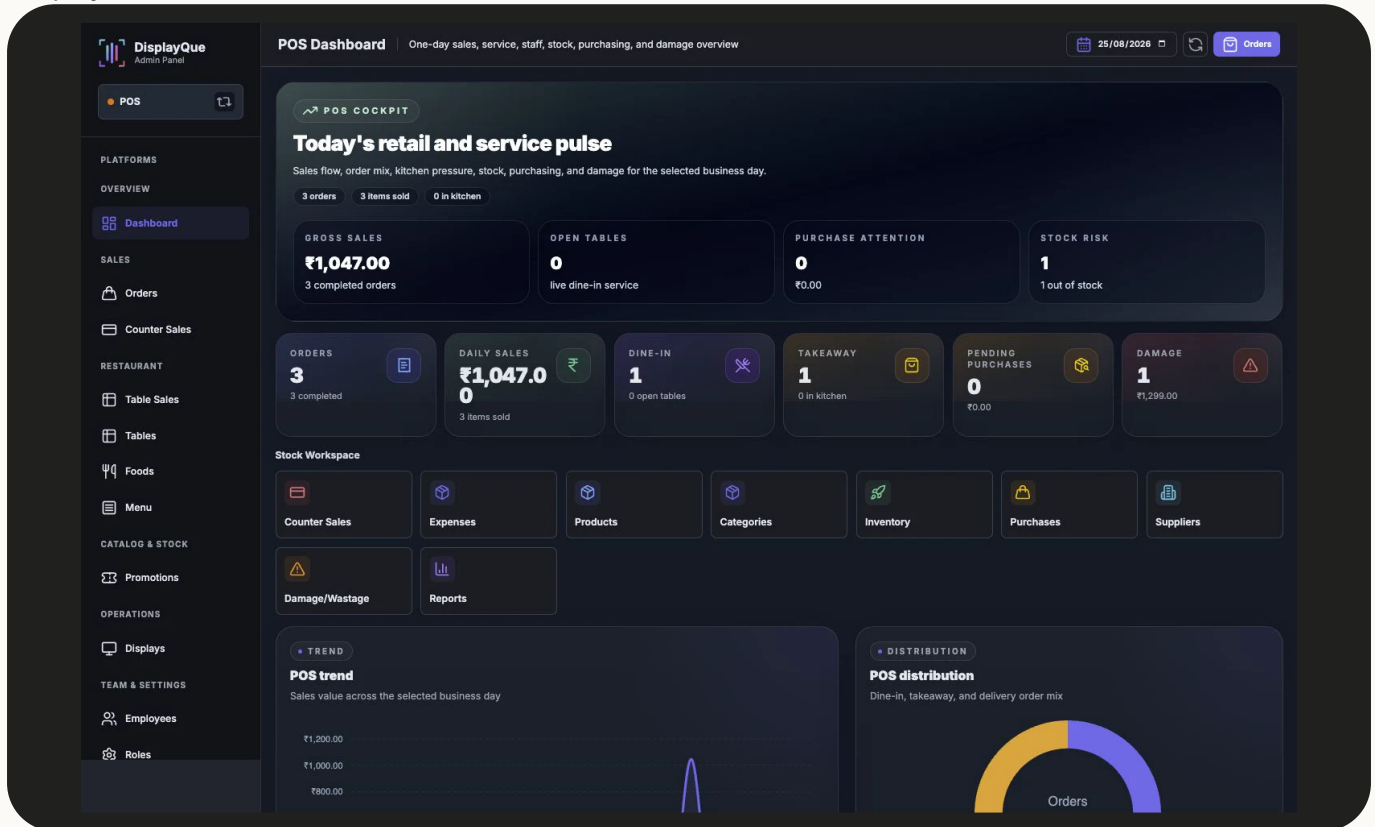

Plan it with MeFirst

Map counters, token issuance, operator actions, screen positions and any printer or system integration. Use privacy-appropriate information in public waiting areas.

[Explore StatusBoard >](#)

Connect ordering, billing and handoff.

DisplayQue POS for restaurants, cafes, bakeries, retail and customer-service counters.

Public DisplayQue product-tour screen. Example workspace data; interface may evolve.

DAILY OPERATIONS

One sales workflow

Coordinate table and counter sales, menus, kitchen handoff, billing and payments. Shared products and inventory help keep the wider operation connected.

CUSTOMER SELF-SERVICE

Extend to a kiosk

Plan guided ordering, item selection and payment with a compatible kiosk. Connect the order journey to staff workflows and StatusBoard pickup visibility within the approved integration.

Plan it with MeFirst

Review menus, tax setup, stock, tables, printers, payment providers, languages and connectivity. Test a complete order, cancellation and refund flow before launch.

Configured for your team. Tested in your space.

MeFirst brings the software, screen and operational requirements into one rollout plan.

01

Discover

Document the users, branches, customer journey, existing systems and required modules.

02

Configure

Agree licences, roles, devices, content, business records and any integrations.

03

Pilot

Test real scenarios, permissions, payment or printer connections and interruption handling.

04

Launch & support

Train the team, agree handover ownership and document the support arrangement.

Build around the business

Restaurants & cafes

Menus, ordering, kitchen handoff and pickup.

Retail & branches

Sales, stock, customer records and promotions.

Hotels & workplaces

Information screens and internal communication.

Clinics & service desks

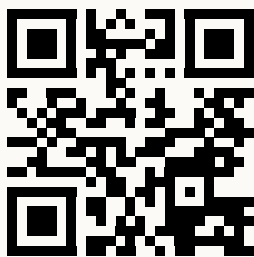

Tokens, counter assignment and public status.

Confirm module availability, language support, integrations and continuity requirements before committing to a rollout.

Let's connect your business.

Tell us how your team sells, serves and communicates. We will map a DisplayQue workflow around your users, locations and devices.
