WOODEN PREMIUM KIOSK

A purpose-built digital kiosk for self-service, information, ordering, wayfinding and brand communication.

One kiosk. Many customer journeys.

A refined portrait display enclosure that brings commercial-grade digital communication into customer-facing spaces without looking industrial.

Designed as a complete system

The enclosure, Samsung professional display, player, software workflow, network and optional touch layer are planned together for the job the kiosk must perform.

- OK Portrait-first visual impact
- OK Touch or non-touch configuration
- OK Custom finish and branding options

Ideal for

- 01 Self-ordering
Menus, selections and guided checkout
- 02 Visitor information
Directories, notices and service guidance
- 03 Wayfinding
Interactive or passive navigation
- 04 Digital promotions
Campaigns, launches and product stories

Built to engage. Styled to belong.

The wooden finish softens the technology, while the full-height portrait format keeps content visible and easy to approach.

SLIM PROFILE

BACK PROFILE

A premium presence

Rounded edges, a full-view front and warm wooden surfaces create a polished fixture suited to hospitality, retail and reception areas.

Content that stays current

Use a compatible signage player and CMS workflow to publish menus, campaigns, information or live operational content.

Ready for interaction

Choose touch when users need to browse, order, check in or navigate. Choose non-touch for passive communication and advertising.

Customer-facing by design

Plan placement around approach path, user reach, glare, power, network access and service clearance.

EVENTS

The right hardware around the right workflow.

Every deployment is scoped around the action a customer or operator needs to complete.

01

Commercial display

Samsung professional panel integration creates a portrait canvas for menus, campaigns and information. Select the exact model around viewing distance, ambient light and planned operating hours. Confirm brightness, connectivity and display specifications as part of the approved configuration.

02

Touch-ready

Choose touch for browsing, ordering, check-in or guided navigation. Choose non-touch for passive promotions and information. Plan screen layouts around comfortable reach, clear prompts and easy-to-read controls; confirm application compatibility and any required peripherals before production.

03

Protected surface

The reference configuration uses 6 mm toughened glass across the front for a clean presentation. Rounded enclosure edges and a coordinated finish suit customer-facing interiors. Agree the final glass, finish, cleaning method and touch-layer requirements during the project review.

04

Built-in playback

Integrated digital signage player support brings scheduled content to the display. Plan a compatible CMS for publishing menus, offers and brand stories. Confirm media formats, network access, update frequency and who will manage content before the kiosk goes live.

05

Business software

Scope the kiosk around compatible POS, token, signage or custom application workflows. Map the customer journey and required integrations before selecting software and peripherals. Confirm licensing, connectivity, application ownership and support responsibilities in the approved project scope.

06

Audio and access

The reference configuration includes 2 x 10 W speakers, rear ventilation and service/cable access. Plan audio for the venue, route power and network cables neatly, and keep the rear clear for maintenance. Final access requirements depend on the installed components.

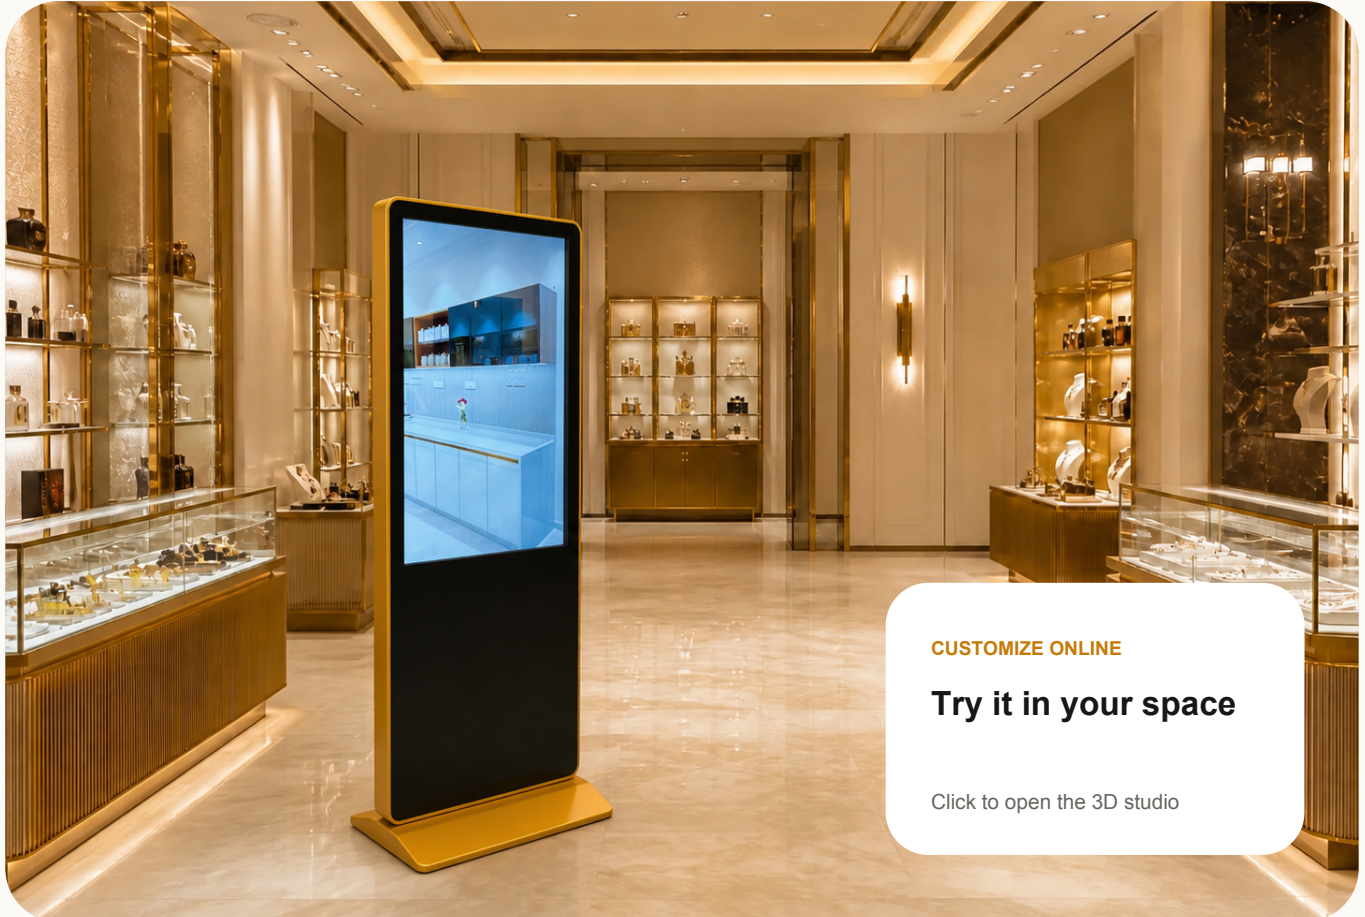

A system, not just a cabinet

Display + enclosure + player + application + network + content + support

Match the kiosk to your space.

Start with the signature wooden finish or choose a contemporary surface treatment for your interior and brand language.

Customization checklist

- OK** Finish and colour
- OK** Logo and brand graphics
- OK** Touch or non-touch
- OK** Screen content format
- OK** Software and peripherals
- OK** Placement and mobility

Final materials, colours, branding, peripherals and software are confirmed in the approved production scope.

Production dimensions at a glance.

Reference dimensions for the 55-inch kiosk. Measurements are in millimetres; final approved shop drawings and the exact display model govern production.

Overall envelope

BODY / 55-INCH

1800 H x 810 W x 50 D mm

BASE

850 W x 350 D x 50 H mm

DISPLAY MODULE

1124 H x 644.8 W x 28 D mm

FRONT SURFACE

6 mm toughened glass

Configuration notes

- OK** Portrait commercial display integration
- OK** Touch or non-touch project scope
- OK** Integrated player and content workflow
- OK** Rear ventilation and service access
- OK** 2 x 10 W integrated speakers
- OK** Five visual finish directions

Before quotation

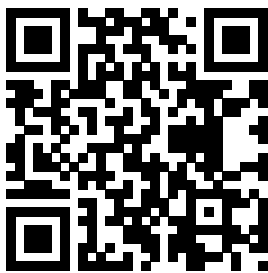

Share the project inputs that determine the final configuration.

- 1** Site and placement photos
- 2** Customer journey / use case
- 3** Touch and peripheral needs
- 4** Software or CMS requirement
- 5** Network and power availability
- 6** Quantity and rollout locations

See it in your space.

Rotate the kiosk in 3D, compare finishes, try your own screen content and preview it against a photo of your shop.
